

MEP • MANUFACTURING
EXTENSION PARTNERSHIP

Maryland MEP (MD MEP)

The MD MEP brings a new approach to benefit and advance small to medium sized manufacturers in Maryland. At core, the MD MEP staff embraces an entrepreneurial and partnership engagement approach. Through the MD MEP's past work with NIST MEP and MEP Center partners across the U.S., the center proactively engaged partners that could help deliver various parts of their programs in Lean, GSN, E3 and Innovation Black Belt Training. MD MEP recognize that their organization can only be successful by multiplying efforts through building vested partnerships with manufacturing stakeholders throughout the state. MD MEP values the face-to-face engagement and the need for all staff, including the director, to get out of the office and on to the shop floor. Lastly, MD MEP recognizes the importance of focusing on growth and innovation as the pathway to creating manufacturers who can contribute to the economic growth of the State.

* Maryland MEP was recently awarded a cooperative agreement and became part of the MEP network in August 2013.
